A Risk Management Approach.
Institutions must rethink their risk management strategy and adopt a holistic approach to NFR in order to reduce potential liabilities while improving effectiveness.

1. Building a comprehensive NFR strategy. An effective NFR management program begins with a comprehensive approach to identify all the non-financial risks facing an organization, based on a detailed risk taxonomy and a holistic risk identification process. The following four specific levers should be considered: First, a clear process and explicit ownership to incorporate all material NFRs into the business strategies and risk management processes. Financial Institutions Management's central theme is that the risks faced by FI managers and the methods and markets through which these risks are managed are similar whether an institution is chartered as a commercial bank, a savings bank, an investment bank, or an insurance company. As in any stockholder-owned corporation, the goal of FI managers should always be to maximize the value of the financial intermediary.
