68 How Tactile Writing Began: Haly’s Education of the Blind 176
Working with the BBC, Neil MacGregor, the Director of the British Museum, has launched a downright smart project. A History of the World in 100 Objects uses important pieces from the museum's collections to recount the long history of humanity. Throughout the year, the serialized radio program will air 100 episodes, each averaging 15 minutes, and they will cover two million years of human innovation and artistic creation. Below, I've included a recent episode that revisits the Olduvai hand axe, a tool invented some 1.2 million years ago that proved vital to human evolution and our mi
Roderick Cave. A study of books through history is a study of human history. In The History of the Book in 100 Books, the author explores 100 books that have played a critical role in the creation and expansion of books and all that they bring -- literacy, numeracy, expansion of knowledge, religion, political theory, oppression, liberation, and much more. The book is ordered chronologically and divided thematically. Each of the 100 sections focuses on one book that represents a particular development in the evolution of books and in turn, world history and society. Abundant photographs inform
